

**Project Title**  
**Facilities, Equipment and Other Resources**

██████████ will provide the project staff and contractors described in the Budget Justification.

Project staff housed at ██████████ offices will be provided with computers, technical support, and access to the internal network with peripherals and web access, IT support, HR services, office space/equipment, meeting space, and general accounting and payroll services. Staff working remotely provide personal computers and connectivity, but are supported by all the other items listed. A separate accounting firm conducts annual audits and ██████████ maintains liability insurance to cover all off-site activities they oversee. These administrative assets and practices will support the Project. ██████████ will also provide space for in-person meetings of the grant's PI leadership, RPP, and curriculum writing teams as well as the site(s) for the in-person PD sessions through our ██████████-based facilities, or by using our network of distributed physical hubs and partnerships throughout the state of ██████████. ██████████ will make its existing online resources available to the project including digital audio and video recording platforms, including Zoom, and project management systems, such as Click-Up to aid with curriculum writing. These data will be stored via ██████████ Google cloud and Zoho, a secured-cloud-based software. The proposed PD will include materials created from previously NSF-funded statewide-implemented resources from ██████████ partners, ██████████, and its NSF-funded grants, ██████████ ██████████.

The external evaluators from ██████████, Dr. ██████████, Dr. ██████████ and their staff, will be provided with office space/equipment, and the project will be supported by the ██████████ digital network, their secure survey tool, NoviSurvey, and the secure data storage systems as described in the Data Management Plan.

██ will provide the faculty and students as described in the Budget Justification. ██████████ project staff will be provided with accessible, well-equipped, and secure office space, meeting rooms, equipped with modern computers, a full suite of applications, high-speed networking, collaboration tools, and access to standard office equipment and resources. ██████████ also has technical capacity and resources for digital video production which will be made available to support the project as needed. Project personnel will have access to servers, wireless networking, digital conferencing, and computer operations. ██████████ Institutional Review Board will serve as IRB of record for the ██████████ ██████████ project.
